The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laurette 1,135,300 in view of Halevy 1,554,211. Laurette '300 teach upright frame members 11,12 with upright 11 having attachment means 14 partially extending thereinto and upright 12 having slots 15 extending at an angle thereinto. Horizontal rods are illustrated at 13 for reception into attachment means 14 and 15. Halevy '211 teach an A-frame foldable rack comprising front and rear frames 70 and 72 having hinge means having a stop (see top of Figure 2). To combine the teachings of Laurette and Halevy (herein referred to as the combination) to provide a foldable rack with rods to receive articles thereon would have been obvious for one having ordinary skill in the art at the time of the invention.

Claims 5-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over The Combination further in view of Derman 2,633,998. Derman teach a bracket for supporting a frame over a door. To employ this teaching with the combination for the purpose of supporting it over a door would have been obvious for one having ordinary skill in the art at the time of the invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Similar racks to show various aspects of the present device are

illustrated by Pettit 542,535; Cicero 2,090,108; Victor D76906; Kostigian 5,590,435;
Willcox 1,858,653; Willner 906,347.
